The Construction of the Removable Shelf with Dividers.

Step one: Take three removable shelves and four dividers. With two of the removable shelves, slide-in both double slotted dividers on opposite ends of the removable shelves for support.

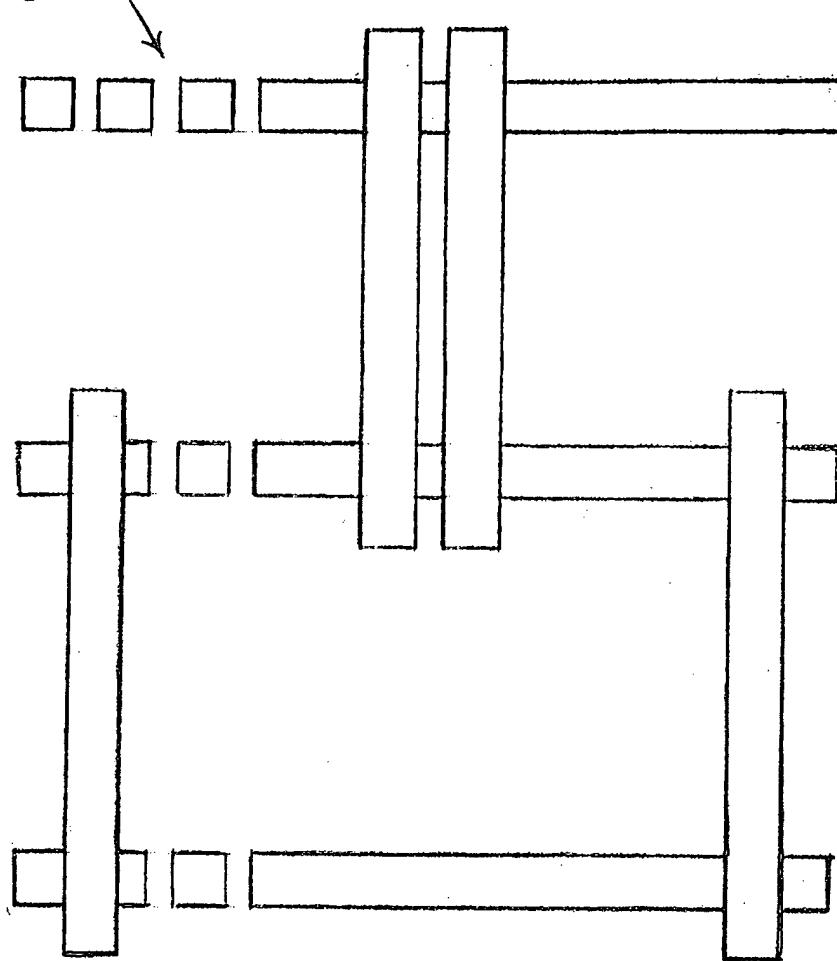

"Fig." 4

When assembled, a double shelf or stand is formed.

Step two: Using the third removable shelf and two more double slotted dividers, slide them both near the center of the second shelf. This now strongly connects the third and second shelves to the third removable shelf.

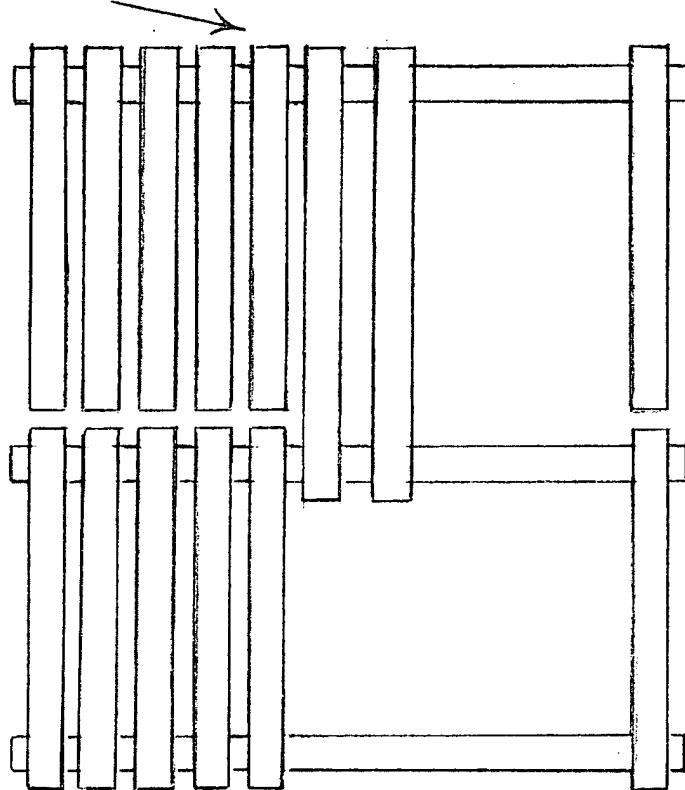

"Fig. " 5

Step three: With the double slotted dividers supporting both top shelves, use the single slotted dividers and insert them in any combination so desired.

When individual compartments are made, a wide variety of different mailing materials can be placed in each compartments eliminating wasted space in both mailing containers.

"Fig. " 6

On the top shelf:

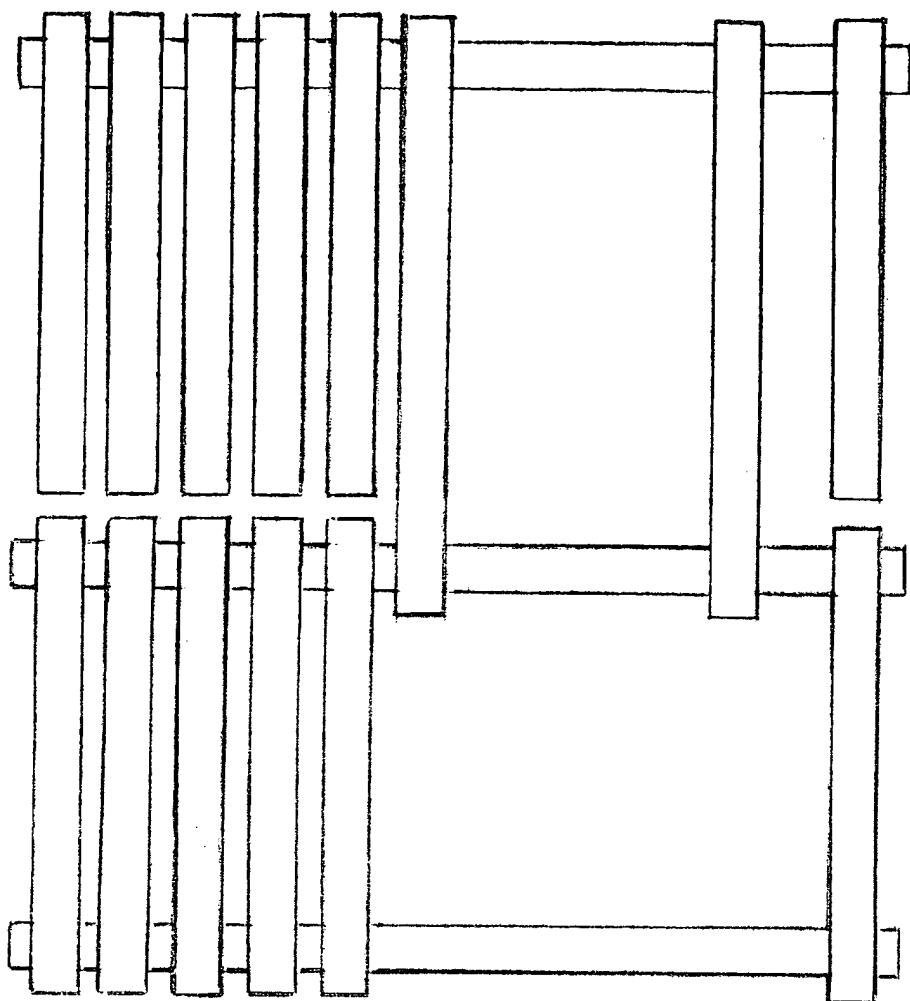

Blueprints
Documents
Mailing tubes
Over size mailers
Packages
Trays of mail
X-ray scans

On the bottom shelf:

Mailing tubs
Newspapers/Magazines
Sacks of mails

Thank you
